

## Cipher Challenge 2:

**T**wo prisoners are being held at command, suspected of being SVR spies. When the prisoners were apprehended, a third person was seen running from the scene. As the person fled, a piece of paper fell from their pocket. The paper has nothing but garbled letters and we believe it to be an encrypted communication, but have no idea as to the method of encryption. Please help decode the message so we can pursue the third suspect and get evidence against the prisoners.
