

Deal or No Deal!

Making Comparisons (Investigation 1 pp. 5-15)

Name: _____ Date: _____

Period: _____

Directions: Below are some statements about Ratios and Making Comparisons.

1. Before the Investigation: Read each statement carefully. Place a check mark in the column you believe is correct (**DEAL:** Agree with the statement; **NO DEAL:** Don't agree). Be prepared to share your responses.

2. After the Investigation: Revisit your answers. In your reflection note any changes you'd make and why.

DEAL	NO DEAL	
_____	_____	1. Companies often use ratios when comparing products in ads.
_____	_____	2. Ratios and fractions are the same.
_____	_____	3. Three ways of making comparisons are ratio comparisons, percent comparisons, and difference comparisons.
_____	_____	4. Ratios tell how one quantity (number) is related to another quantity (number).
_____	_____	5. The ratio of 25 to 40 is 2:5.
_____	_____	6. Oscar makes \$5.00 an hour mowing lawns and Allison makes \$6.50 stocking at the grocery store. This is an example of a percent comparison.

TAKING IT TO THE BANK - REFLECTION

Any changes in the above? Why or why not?
