

Course Prefix and Number: SOC 340 – Social Interaction

Learner Outcomes	Assessment
Students will be able to accurately identify contrasting theoretical perspectives regarding social interaction.	Students will be tested and required to accurately identify the core assumptions of various theoretical perspectives of social interaction.
Students will be able to identify the intellectual heritage and progression of the development of theories affecting social interaction.	Students will be tested on their knowledge of the historical progression of various theories of social interaction requiring them to appreciate how prior theoretical developments affect current theories.
Students will demonstrate their understanding of how various theoretical approaches to social interaction influence behavior.	Students will write papers where they accurately apply their theoretical understanding of social interaction to real-life contexts or situations.
Students will communicate and critically analyze various theoretical approaches to social interaction with other students.	Students will participate in classroom activities (e.g. group discussions, in-class presentations, etc.) in which they critically analyze and communicate theoretical perspectives of social interaction.
