

Course Prefix & Number SOC 380 – Social Ecology

LEARNER OUTCOMES	ASSESSMENT
Discuss and explain the historical evolution of human societies.	Students will complete exams or written assignments, demonstrating recognition of and ability to discuss the milestones in the evolution of human societies.
Define and illustrate major subsistence technologies and the types of human societies they are associated with.	Students will complete assignments to discuss the major features of different subsistence technologies and how they come to shape social institutions and social relations.
Identify and discuss the relationship between geographic environment and evolution of human societies.	Students will compare and contrast ecological environment of earlier human societies in Middle East, China, Europe, Africa, and America.
Recognize the consequence of unlimited growth/consumption and promote environmentally responsible behaviors.	Students will complete written assignment to examine their consumption behavior and identify areas for change.
