“Substance Abuse: Relevance to YOU (the College Student)”
Followed by... “Ask a Med-Student”

Come join us on Tuesday, April 2nd at 3:00PM in Lind 215 for a conversation with PNWU students about substance abuse and how it impacts the college-age population. Information presented will be structured around mechanisms of action, tolerance, dependence, abuse, and resources for help. A question and answer session will follow. There will also be a time for students to ask questions about pre-medicine programs and medical school.
