

Meet Marion Andrin, Information Technology Specialist 5 in the Auxiliary Computing Services Department

“Marion has spent quite a bit of time creating a swipe card system for some of the departments in Student Success, including ours. This is a new project, built from the ground up. Along the way, we have made a number of requests to Marion, asking for additional features or changes. Each time, I was impressed with how quickly Marion responded to our requests and made necessary changes. She has been open to questions and suggestions and, because of her timely efforts, we were able to use the swipe card system at an event for the first time last week. I really appreciate getting to work with someone like Marion, who clearly cares about the quality of her work and her customer service!”

Thank you for exhibiting the Wildcat Way, Marion!
