

9.2. *Energy Studies*

9.2.1. *Mission*

The Energy Studies Program introduces technical concepts and language, investigates energy use patterns and examines the environmental, legal, institutional and economic factors influencing energy policy.

9.2.2. *Objectives*

Students who complete and energy studies minor will.

- Learn the language and the underlying science/technology of energy;
- Develop an understanding of current and projected global energy use patterns and related environmental conflicts;
- Learn the legal, institutional, and economic factors that influence energy policy;
- Become informed community members, able to critically discuss energy issues and contribute to the local, national, and global debate over them; and
- Understand the aspects of energy and its use in the context of sustainability.

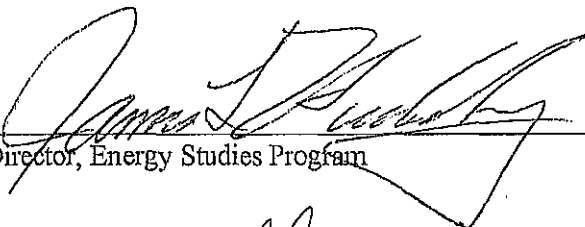

9.2.3. *Residence*

The Energy Studies Program resides within the College of the Sciences.

9.2.4. *Program Specific Provisions*

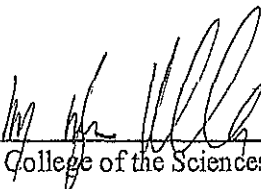

None; University policy pertains.
