Proudly Present

**Ken Denman**  
CEO & Chairman  
iPass, Inc.

The Power of the Platform:  
Innovative Architecture for  
Internet-Based Services

**Lecture in Business**

**With Guest Speaker Ken Denman**

CWU alumnus Ken Denman, chief executive officer and chairman of the board at iPass, Inc. (San Mateo, CA) is focused on making enterprise connectively service secure, easy-to-use and available from any location of the world, on any platform installed and any device deployed. Denman is a 1980 Accounting graduate.

Since joining iPass in October 2001, Denman has guided the company in leveraging the explosion in new broadband and wireless access technologies to make them real and globally available to any enterprise or service provider. Under his leadership, iPass has remade itself, from a leading aggregator of dial-up remote access networks, into a company that provides a broad array of enterprise connectivity technologies that meet the needs of large corporate customers with thousands of traveling and telecommuting employees, all which require secure access to their corporate networks, mission-critical applications, email and the Internet.

Denman's career spans more than 20 years in the telecommunications and IT industries, with both domestic and global market experience. Before joining iPass, Denman was the founder, president and CEO of AuraServ Communications, a managed service provider of broadband voice and data applications. He has a strong background in the wireless industry, having held executive positions in the wireless and broadband divisions of MediaOne and US WEST. Denman was senior vice president of the National Markets Group at MediaOne's Domestic Broadband Unit before founding AuraServ; and prior to that, he was chief operating officer of the wireless portfolio at MediaOne International in London. Denman currently serves on the board of directors of Openwave, a publicly traded leading provider of open software products and services for the communications industry.

In addition to a bachelor's degree from CWU, Denman holds an MBA from the University of Washington.
