

Pre-Lab 3

Pre-Labs are **individual** assignments – **not** done in pairs. Their purpose is to prepare you for the next class and lab activity by **reading the textbook**. *Reading is generally not considered as a pair activity.*

By writing your name below, you are pledging that the answers below are your own and not that of someone else.

Name: _____

Read Chapter3 and answer the following study questions

1. What are the **four** operations that can be used in a math **expression** in Alice?
2. List **four** different control structures used in creating a program in Alice.
3. What type of function value is used to check a condition in an **If/Else** statement?
4. What is the purpose of a Loop statement?
