

Ask Yourself

- ◇ Did I do better on my portfolio entries or assessment center exercises?
- ◇ What is the range of my portfolio scores? Are the portfolio scores even (falling within a narrow range) or uneven?
- ◇ Is any one portfolio score dramatically higher or lower than others? If yes, why? What can I learn from my success in that entry?
- ◇ For each portfolio entry I might retake, do I need to change elements of my practice or simply do a better job of showing evidence of the key concepts in the rubric and standards for that entry?
- ◇ What is the range of the assessment center scores? Are my assessment center scores even (falling within a narrow range) or uneven?
- ◇ Is any one assessment center score dramatically higher or lower than others? If yes, what possible explanations are there for this?
- ◇ Did any of my scores deviate significantly from my expected score for that entry or exercise? (*Did I do well on entries or exercises I thought were strong and less well on entries or exercises I sensed were weaker?*)
- ◇ Of my scores below 2.75, which can I significantly increase? (These may or may not be your lowest scores.)
- ◇ Of my scores below 2.75, which might I be unlikely to significantly improve? Why?
- ◇ What insights/changes related to the specific entry might help me improve my score?
- ◇ Given my personal and professional responsibilities for the year, how many entries would it be advisable to retake this year?
