

Hiding and Unhiding the Course Menu

1. To temporarily hide a course's course menu click the "Show/Hide" course menu button (See A below.) This collapses the course menu making it easier for you to see the rest of your courses contents (See B below)

2. To unhide the course menu click the Show course menu button (See B above.) Remember that **if you ever get into a Blackboard course and you can't see any of the courses links on the left side of the page that usually signifies that your course menu is hidden.** Click the Show course menu button to make your course menu reappear.
