

## **Students' Response to 2003 SETC Survey about the NO LIMIT! Project**

***Question:* What were the biggest or most important impacts of the NO LIMIT! Project for you?**

*Student Answer:* Thought it was pretty amazing. Had never done the Hovercraft before. Used to doing math the boring old way, but learning with hands-on really helped me learn things I had trying to learn for the last 3 years or so. - Jacob W.

*Student Answer:* Helps teamwork (counting on someone and trusting someone; having someone trust you too); The projects were fun. - Brittney H.

*Student Answer:* Liked the hovercraft- all got to join in making it and the riding was the most fun. - Ashley T.

*Student Answer:* I like more hands on projects to make math interesting and having something when you finish.
