Create breakout sessions

You can easily create breakout sessions if you're the host or cohost. You can create the sessions any time during the meeting and start them when you're ready.

Hosts and cohosts can also [create the breakout sessions and reassign participants when they schedule a meeting](#), as well as allowing participants to join any session.

This feature is supported on Webex Meetings and Webex Webinars. On Webex App, this feature is available on our Webex Suite meeting platform. [Find out if your meetings use the Webex Suite meeting platform](#).

Find out [what you can do in breakout sessions](#), depending on your role in a meeting.

1 From the Breakout menu, click Enable Breakout Sessions.

You can also enable the breakout session feature when you [schedule a meeting](#) or [schedule a webinar](#).

When you turn on breakout sessions, the Breakout sessions button appears in the meeting controls.

2 In your meeting, select Breakout Sessions.

Only one host or cohost can open the Breakout session assignment dialog box at a time.

- WebEx Provides Instructions (if needed)
 - Enable breakout Sessions (meeting controls)
 - Automatic or manual assignments
 - Rename breakout sessions
