# Exams AI bots

Real-life inspired take-home exam

Students use AI bots =>

Students must use AI bots!

- Use 4 AI bots to answer the exam question
- Compare the bot's answers
- Challenge the bots with peer reviewed papers
- Grade the AI bot's answers

# Exams AI bots ?

## ***Was this exam a learning opportunity for you?***

At first i thought this exam was gonna be super easy since we were using AI but I really had to apply myself with reading all the answers and summarizing them all accordingly.

It opened my eyes how diverse each bot can be based on the question being asked. I noticed some bots like ChatGPT used no evidence or research articles.

## ***Was this exam - in your eyes - applied and real-life relevant?***

I feel like this was a great way for me to apply my critical thinking to what we have been talking about in class and [...] test that knowledge against some AI bots.

I think this exam was 100% real life relevant. [...] Especially considering that AI is likely only going to get better, I think having a good understanding of how to navigate it now will only be e helpful tool in the future.
