# Learner outcomes, activities, & assessment

(Form is on the back)

## Verbs for Use in Writing Learner Outcomes

500-Level Credit Courses should utilize higher level outcomes: Analysis, Synthesis, and Evaluation.

<b>Knowledge</b> (recall of information)	<b>Comprehension</b> (interpret information in one's own words)	<b>Application</b> (use knowledge or generalization in a new situation)	<b>Analysis</b> (break knowledge into parts and show relationships among parts)	<b>Synthesis</b> (bring parts together to form a whole; build relationships for new situations)	<b>Evaluation</b> (make judgments on basis of given criteria)

### Example Learner Outcome for a course:

The following sample is not all-inclusive; the Curriculum Committee is most interested in a progression of learner outcomes. Additionally, the Curriculum Committee wants to see a match between learner outcomes and assessments.

<b>Learner Outcome</b> What skills/knowledge will be acquired via the course?	<b>Activity</b> How will you teach the learner outcome?	<b>Assessment</b> Measurement of the learning achieved.
<b>Construct</b> meaningful rubrics to enhance student learning and showcase learning objectives.	Working in groups, students will <b>assess</b> and <b>classify</b> key learnings from a classroom unit and appropriately <b>differentiate</b> the benchmarks by <b>creating</b> a new rubric.	Completed rubric will be reviewed and evaluated by faculty mentor with a goal of 80% or better inclusion of required rubric components.
