GENERAL INFORMATION

- Most positions require the Registered Dietitian (RD) credential. Become an RD through an accredited bachelor's or master's program followed by an approved, supervised internship. RD's must also pass the Registration Examination for Dietitians.
- Research individual state requirements for licensure or certification to practice dietetics.
- Scientific aptitude is required to successfully earn a degree in nutrition. Basic sciences play a large role in this discipline.
- One should enjoy helping people, working with healthcare professionals, and have an interest in good health, nutrition, and fitness. Get involved in campus wellness or peer health educator programs to gain experience.
- Volunteer in hospitals or nursing care centers to test interests.
- The ability to work independently and as part of a team is important in this field.
- Clients may be seen individually or in groups. Learn the fundamentals of human relations and group dynamics.
- Strong communication skills are necessary to interact effectively with patients and healthcare professionals. Develop good interviewing and counseling techniques.
- Over half of dietitians and nutritionists work in hospitals, nursing homes, or physicians' offices.
- Research, public health, and advanced clinical positions require a graduate degree.
- Over half of RD's hold an advanced degree. Consider pursuing further education.
- Consider gaining specialized certifications in areas such as pediatric or renal nutrition, nutrition support, diabetes education, etc.
