

Revised: June 2016

Considering a minor? Why not Public Health?

29 to 30 credits that could change your life – and the world:

PUBH 230 - Foundations of Public Health (3)

PUBH 250 - Introduction to Public Health Policy and Systems (3)

PUBH 310 - Community Health (3)

PUBH 311 - Cross Cultural Practice in Public Health (3)

PUBH 375 - Theories of Health Behavior (3)

PUBH 460 - Public Health Ethics (3)

PUBH 470 - Population Health Assessment and Research (5)

Electives (6-7 credits of any PUBH course)

Students completing the minor take the courses listed above, along with two other public health courses from a long and growing list of options: choose from consumer health, environmental health, epidemiology, global health, infectious and non-infectious disease, the politics of food and health, sexual health, community mental health, administration and grant writing, women's health and more. Under revision for 2017-2018.

Go out to eat recently and not gotten sick? Public health. Wear a seatbelt every time you're in a car? Public health. Concerned about health issues and interested in ways to help solve them? That's public health.

Think your major doesn't go with a public health minor? Find out how a background in public health may be a good fit for *your* future plans!
