

Extended Insurance Hold Lift Exception Form

Students who complete this form and are found eligible based on summer international student insurance requirements can be granted an exceptional extended insurance hold lift. This lift will allow a student without adequate fall insurance coverage to have their insurance hold removed for the entire fall registration period. In order to be eligible for this lift, students must meet all three of the following conditions:

- a) Student must provide OISP with proof of adequate insurance coverage for the required summer quarter coverage period OR provide OISP with adequate confirmation of travel to the student's home country for the entire summer quarter.
b) If a student changes their summer insurance coverage or travel plans to a state which is no longer considered adequate, they must inform OISP.
c) Student must indicate compliance with statements 1-3 below by initialing each.

By signing this form, I agree to comply with all conditions listed:

- 1. I understand that I do not currently have adequate health insurance coverage for fall quarter as required by CWU's international student health insurance policy.
2. I will procure adequate health insurance coverage as required by CWU policy by September 25th, 2019 and provide OISP with all required documentation, or I understand that I will be automatically enrolled in and be required to provide payment for CWU's Student Health Insurance Plan (SHIP) at an approximate cost of \$700.
3. I understand that OISP will send important correspondence regarding health insurance through the CWU email system, including over the summer quarter.
